

from Process Builder → to Lightning Flow

Submit for Approval

Flow is more similar to Process Builder than you might think!

In Process Builder, you click on the **add Action** and select **Approval Process**

Select and Define Action

Action Type*
Submit for Approval

Action Name* ⓘ
Approve Inactive Status

Object*
Account

Approval Process*
Specific approval process | Account Not Active - Account_I

Add Element

Interaction

Action
Perform an action outside of the flow. Ch...

In the After Flow, you add an Action

Action

appro

Submit for Approval
submit-submit

In the **Action** field, type "Approval" and select the **Submit for Approval** action

Name the Action

Use **\$Record.Id** for the Record Id field.

New Action

Action
Submit for Approval

Use values from earlier in the flow to set the inputs for the "Submit for Approval" core action. To use its outputs later in the flow, store them in variables.

* Label: action_ApproveInactiveStatus | * API Name: action_ApproveInactiveStatus

Description

Set Input Values

A_a * Record ID: {\$Record.Id}

A_a Approval Process Name Or ID: Account_Not_Active Include

Toggle on the Approval Process name and paste in the Approval Process' Unique Name
